Sequence 41, Application US/09049698

Patent No. 6368792

GENERAL INFORMATION:

APPLICANT: BILLING-MEDEL, PATRICIA A.

APPLICANT: COLETY, TRACEY L.

APPLICANT: KLASS, MICHAEL R.

APPLICANT: RASSENDEN, MARK

APPLICANT: RUSSELL, JOHN C.

APPLICANT: ARGENTS RASE S.

APPLICANT: ARGENTS RASE S.

APPLICANT: TREE OF INVENTION: REAGENTS AND METHODS FOR THE

TITLE OF INVENTION: TRACT

NUMBER OF SEQUENCES: 51

CORRESPONDERS B.

ADDRESSER: Abbort Laboratories

STATE: 11

CONTYN: USA

ZIP: 60064-3500

Patent No. 6309857
GENERAL INFORMATION:
GENERAL INFORMATION:
TITLE OF INVENTION: Nucleotide Sequences Encoding Mammalian Calcium
TITLE OF INVENTION: Activated Chloride Channel-Adhesion Molecules
FILE REFERENCE: 18617.0052
CURRENT APPLICATION NUMBER: US/09/193,562D
CURRENT FILING DATE: 1998-11-17
                                                                                 228

Patent No. 6309857
GENERAL INFORMATION:
APPLICART: Pauli, Benedicht U.
TITLE OF INVENTION: Nucleotide Sequences Encoding Mammalian Calcium
TITLE OF INVENTION: Activated Chloride Channel-Adhesion Molecules
FILE REFERENCE: 18617.0052
CURRENT APPLICATION NUMBER: US/09/193,562D
CURRENT FILING DATE: 1998-11-17
PRIOR APPLICATION NUMBER: US/60/065,922
PRIOR FILING DATE: 1999-11-17
SEQ ID NOS: 47
SEQ ID NOS: 47
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                902

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Sequence 16, 1

Patent No. 6500938
GENERAL INFORMATION:
APPLICANT: Janice Au-Young
APPLICANT: Jeffrey J. Seilhamer
TITLE OF INVENTION: COMPOSITION FOR THE DETECTION OF SIGNALING
TITLE OF INVENTION: PATHWAY GENE EXPRESSION
NUMBER OF SEQUENCES: 1490

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          CCAAAGAGATCCCAGACTGCCAAGGAATCCATTGTGTTTATGCAAAATCTTGATTCTGTG 756
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  96
## Sequence 29, Application US/09193562D
## Patent No. 6309957
## Patent No. 6309957
## Patent No. 6309957
## Patent No. 6309657
## PAPLICANT: Pauli, Benedicht U.
## TITLE OF INVENTION: Nuclectide Sequences Encoding Mammalian Calcium
## TITLE OF INVENTION: Nuclectide Chloride Channel-Adhesion Molecules
## PITLE OF INVENTION: Activated Chloride Channel-Adhesion Molecules
## CURRENT APPLICATION NUMBER: US/09/193,562D
## CURRENT APPLICATION NUMBER: US/60/065,922
## PRIOR FILING DATE: 1997-11-17
## PRIOR FILING DATE: 1997-11-17
